Our mission is to prepare teachers who are reflective scholars (access and learn), instructional leaders (model and mentor), and global citizens (respond and challenge) and to serve the community and profession promoting and facilitating best practice in education. Our mission is to prepare teachers who are reflective scholars (access and learn), instructional leaders (model and mentor), and global citizens (respond and challenge) and to serve the community and profession promoting and facilitating best practice in education.

Program Objectives

Where the Art and Science of Effective Teaching WORK TOGETHER.

To provide elementary and secondary teachers with professional development grounded in educational research directly applicable to learning, student diversity, classroom instruction and management. Graduates are qualified to actively research and apply best practice and provide leadership to colleagues and school corporations as professional development leaders and trainers. The program encourages and facilitates participant progress toward National Board Certification.

The IU East Master of Science in Education program allows you to determine what you want and need to know in order to work most effectively with the students in your school. You determine how you can best impact professional development in our schools. While the emphasis is placed on your objectives, you will have the support of the highly qualified IU East faculty.

The School of Education offers a depth and breadth of expertise unparalleled in our region. From early childhood to adolescence, literacy and reading to math and science, content education to special education, you will have an experienced faculty guiding you through the process.
