

Policy for Requesting Non-Standard Office Computers
Indiana University East
Effective Date: August 1, 2003
Updated: July 1, 2015

The policy applies to all full-time faculty members at IU East

All full-time faculty members are entitled to a desktop office PC with IU standard configurations. Any full-time faculty member may request a different office computer (i.e., a laptop computer, a desktop PC with advanced features, a Mac, or a Linux based workstation) with the approval of their dean. The additional cost must be borne by their school. All office computers, regardless, shall be replaced as required by the University Information Technology Services life cycle policy.
