

Background/Summary:

The Online Completion Program proposed to the HEC and the proposed completion program in conjunction with IVY Tech in Lawrenceburg both take the approach of restricting options for completion of the BS in Psychology degree as approved for IU East. Students will complete the same number of courses/hours of psychology, but will not have the option to choose WHICH courses to take.

The original degree program includes four pairs of courses where the student must complete at least ONE from each pair. In the two completion programs, only one of the pair of courses may be offered. Students must also complete two upper level (300 or 400 level course numbers) courses. There are many options for these courses available on the IU East campus. For the completion programs, specific courses are provided that will fill this requirement.
